PROFESSIONAL SUMMARY

Computer Science graduate and Full Stack Developer with hands-on project experience building responsive, full-stack web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in developing REST APIs, integrating databases, and creating clean, user-focused frontend interfaces. Comfortable working across the MERN stack, from UI design to backend logic and database integration, with a strong foundation in JavaScript and problem-solving. Eager to contribute as a Full Stack Developer / Junior Software Developer in a growth-focused engineering team.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB, SQL

Tools & Platforms: VS Code, Git, Vercel, Render

PROJECTS

NovaVault Store | Game Marketplace E-Commerce Website

- Developed a full-stack game marketplace e-commerce website using React.js for the frontend and Node.js/Express.js for backend logic, with MongoDB for data storage.
- Built a responsive, modern UI to showcase games with a browsing experience suited for a digital game-store concept.
- Implemented search and filter functionality to help users navigate and discover games more easily within the marketplace.
- Structured frontend and backend components separately to maintain clean, scalable, full-stack architecture.
- Live: <https://novavault-store.vercel.app> , GitHub: <https://github.com/Hakkim-Appas-Manthiri-M/NovaVault>

CraftFarm AI | AI Smart Farming Agricultural Website

- Built a responsive web interface for an AI-assisted smart farming platform, focused on presenting agricultural information in a clear, user-friendly layout.
- Developed frontend components using React.js to deliver a modern, accessible experience for farming-related use cases.
- Designed a user-focused layout to support smart farming concepts, with an emphasis on usability and clarity of information.
- Live: <https://craftfarm-ai.vercel.app> , GitHub: <https://github.com/Hakkim-Appas-Manthiri-M/craftfarm-ai>

CodePort | Personal Portfolio Website

- Designed and developed a personal developer portfolio using React.js to showcase projects, technical skills, and profile information.
- Built a fully responsive layout with a modern UI/UX approach to present projects clearly across devices.
- Deployed the portfolio on Vercel, making it publicly accessible as a live project showcase.
- Live: <https://my-codeport.vercel.app> , GitHub: https://github.com/Hakkim-Appas-Manthiri-M/my_codeport

WeatherX | Live Weather Forecast Website

- Developed a live weather forecast web application using JavaScript/React with real-time weather API integration.
- Implemented dynamic UI updates to reflect location-based weather information as data is fetched from the API.
- Built a responsive interface to ensure consistent usability of weather information across screen sizes.
- Live: <https://weather-x-beta-six.vercel.app> , GitHub: <https://github.com/Hakkim-Appas-Manthiri-M/WeatherX>

Taskora / *Todo List Workspace Website*

- Built a task management web application with a workspace-style, productivity-oriented interface using JavaScript/React.
- Implemented core CRUD functionality to allow users to create, update, and manage tasks within the workspace.
- Designed a responsive interface to support a smooth task-management experience across devices.
- Live: <https://taskora-tau-bay.vercel.app> , GitHub: <https://github.com/Hakkim-Appas-Manthiri-M/taskora>

EDUCATION

Bachelor of Science - Computer Science (B.Sc. Computer Science)

Madurai Kamaraj University College, Madurai

Year of Passing: 2024

CGPA: 7.4/10

LANGUAGES

Tamil, English
